

IREROBOT

Tender for external service agreement for: project management, dissemination, commercialization and IP, for product development

TENDER DESCRIPTION

We are looking to collaborate with an organization or a group of individuals within the context of recently funded project that aims to create a unique interface for communication using the sense of touch. The project will start in spring 2021. The organization or group of individuals will work closely with the engineering and management team of Irerobot ltd within the context of a two-year work that aims to achieve further development, and ultimately commercialization of the product through a B2B agreement with an internationally established potential partner. The organization or group of individuals will provide external services to Irerobot ltd based on a fixed price for each of the following items, where approximated man-months are included in the parentheses:

1. Project Management (3)
2. Dissemination and Communication Activities (4)
3. Commercialization (6)
4. Industrialization (licensing agreements, B2B agreements, etc.) (1.5).

For a full tender package send an email expressing your interest at: evagoras.xydas@irerobot.com

Tenderer status:

- The tenderer is based in Cyprus or has offices based in Cyprus
- Has a proven portfolio of previous activities that demonstrate successful collaboration with technological start-ups, preferably within the Cypriot ecosystem
- Has proven access to and preferably collaboration with potential B2B partners and investors in the international scene
- Has proven access to financial and IP services within or outside the tenderer organizational structure
- Has previous experience in the implementation of funded projects in supporting beneficiaries with management and communication activities
- Has personnel with previous experience and expertise in related topics
- The group's or organization's human resources include at least one individual with academic degrees specializing in topics related to the tender requirements.

About Irerobot ltd

In a constantly evolving world with increasing dependence on technological innovation and progress, we aim to establish significant presence in the EU R&D ecosystem. We focus on the development of state-of-the-art solutions in the areas of robotics and human-machine interaction. Besides R&D, our activities include consulting for businesses and professional training. Throughout our projects we remain committed to focus on meaning rather than profit and create technology that makes the world a better place.

The tender must be submitted no later than **the 20th of March 2021** to the following email address: evagoras.xydas@irerobot.com. For clarifications you can call: +357-99644287 (from 9:00-17:00 GMT+2).
